DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: **Word current1 and Word current 2 in Fig. 4A; Word current1, Word current 2, Bit current 1, Bit current 2 in Fig. 4B; High voltage, Low voltage, μ - metal and MTJ in Fig. 5; all elements except 700 in Fig. 7; all elements except 800 in Fig. 8; all elements in Fig. 10; all elements except 1100 in Fig. 11B.**

Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: **the shielding magnet 1102 (line 11-12, page 13).** Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to

avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dill et al., 6,114,719.

Dill et al., 6,114,719, discloses in Fig. 6 a magnetic random access memory (MRAM) device comprising:

word lines 301, 302 and 303 perpendicular to bit lines 304, 305 and 306;

magnetic tunnel junction (MTJ) device 270, 272, 274, 276 and 278;

diode 207;

wherein:

bit line control circuitry 251 and word line control circuitry 253, respectively, controlling the bit line current IB and the word line current IW bidirectionally (see lines 39-65,

column 14), therefore, the current in any bit line or word line can be obviously driven in opposite direction to any current in other bit line or word line;
as shown in Fig. 2, each of magnetic tunnel junction (MTJ) device 270, 272, 274, 276 and 278 including a free ferromagnetic layer 132 closed to bit line BL and a pinned/fixed ferromagnetic layer 118.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
